SUMMARY

AI Engineer with experience building and deploying LLM-powered applications, RAG systems, and production AI infrastructure. Skilled in Python, FastAPI, Docker, and modern LLM workflows including fine-tuning, prompt engineering, and evaluation. Built and shipped an AI-powered EdTech platform serving 2,400+ users and contributed research in multilingual NLP, synthetic data generation, and LLM evaluation.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, Bash
AI/ML	PyTorch, TensorFlow, Scikit-learn, Transformers, Hugging Face, Fine-tuning
LLM Engineering	RAG, Prompt Engineering, LoRA/QLoRA, PEFT, LLM Evaluation, Agentic Workflows
Backend & MLOps	FastAPI, REST APIs, Celery, Redis, Docker, Git, Linux, CI/CD, GPU Inference, Model Serving, MLflow, Weights & Biases
Data & Infrastructure	Pandas, NumPy, Vector Databases, FAISS, ChromaDB, Qdrant, vLLM, Ollama, LangChain, LlamaIndex, n8n
Expertise	Bangla NLP, Multilingual NLP, Financial NLP, Synthetic Data, AI Safety, EdTech AI

EXPERIENCE

Systems Architect — Doshomik IELTS January 2026–Present

- Led architecture for an IELTS platform with 33 pages, 47 lesson routes, 14 data models, and 44 automated tests.
- Built a 47-lesson curriculum across 5 skills: listening, reading, writing, speaking, and spelling.
- Designed a Prisma/PostgreSQL schema for learner profiles, progress tracking, study sessions, and attempt history.

Operations Automation Specialist — Khubsoja July 2024–December 2025

- Built automation systems for **100+ daily operations** with FastAPI, Celery, and Redis.
- Designed webhook-driven pipelines linking external APIs with retries and error handling.
- Containerized services with Docker and automated multi-step workflows in n8n, cutting manual work by **80%**.

Data Science Intern — Somikoron AI January 2024–June 2024

- Contributed to NLP-based recommendation systems: built text preprocessing pipelines and feature extraction modules
- Developed data extraction pipelines processing structured and unstructured data sources for ML training
- Assisted in model evaluation and hyperparameter tuning for production ML components

EDUCATION

Jahangirnagar University, Dhaka, Bangladesh

- **M.S. Economics** (2026)
- **B.S. Economics** (2024)

PUBLICATIONS & WORKING PAPERS

- **BENI Global 10: A Multilingual Economic Narrative Corpus for the Global South** ⇒
Multilingual economic news corpus spanning 10 languages and 7 language families; includes a reproducible streaming pipeline and temporally synced cross-lingual index.
- **Economic Narrative Indices and Media-Based Sentiment Measures: A Systematic Review of Methodologies, Applications, and Research Gaps** ⇒
Synthesizes 46 empirical and 20 theoretical studies, finds sentiment models improve forecast accuracy by 12–20%, and highlights major geographic/language gaps.
- **CB-SentiLex: An Auditable Weak-Supervision Framework for Central Bank Stance Detection with a Bangladesh Bank Benchmark** ⇒
Weak supervision framework for central bank stance detection with a Bangladesh Bank benchmark; licensed CC BY 4.0 and not peer reviewed.

OPEN SOURCE PROJECTS

SocialFlow GitHub

- Built an agentic orchestration layer linking OpenAI and local models to external APIs with structured tool execution
- Designed reusable prompt, memory, and state primitives to automate multi-step business workflows end to end

Tracehouse GitHub

- Built a local-first terminal memory system capturing commands, outputs, git context, and agent activity in a searchable log
- Enables debugging and workflow reconstruction without cloud upload, keeping terminal history auditable and private

AutoMLBench PyPI

- Python framework for automated benchmarking across classification, regression, and clustering with standardized metrics

- Compares **20+ model architectures** quickly, reducing setup time and improving reproducibility across datasets

LEADERSHIP

Community Director, AIML Professional Community Bangladesh

2025–Present

- Organize technical workshops and research dissemination events for 200+ member community of AI/ML practitioners
